Project No. 14473-000

Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments,
Motions to Intervene, and Competing Applications

On January 1, 2013, FFP Project 112, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project located at the U.S. Army Corps of Engineers' (Corps) Chouteau Lock and Dam, located on the Verdigris River near the town of Okay in Wagoner County, Oklahoma. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners'

express permission.

The proposed project would consist of the following: (1) a 180-foot-long, 80-foot-wide intake channel with a 120-foot-long retaining wall; (2) a 130-foot-long, 90-foot-wide powerhouse, located on the east side of the dam, containing two generating units with a total capacity of 11.6 MW; (3) a 100-foot-long, 175-foot-wide tailrace with a 50-foot-long retaining wall; (4) a 4.16/69 kilo-Volt (kV) substation; and (5) a 0.3-mile-long, 69 kV transmission line. The proposed project would have an average annual generation of 36,900 megawatt-hours, and utilize surplus water from the Chouteau Lock and Dam, as directed by the Corps.
